DETAILED ACTION

Remark

1. Claims 17-18 and 22-23 were cancelled. Pending claims are 1-16, 19-21, and 24-31 for examination.

Allowable Subject Matter

2. Claims 1-16, 19-21, and 24-31 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 10 (with a private IP address in the digital receiver), and 11 (checking and identifying private IP address vs the previous one stored in the digital receiver), the prior art of record issued to Shoff, Mao, and Perlman fails to either alone or combine to teach or suggest a method of identifying data stream in a digital television, wherein none of prior art teaches a technique of identifying multicast IP data streams within the digital television receiver by assigning an IP address to each multicast IP data stream, and further in mapping a locator (which identifying a multicast IP data stream) to the IP address by the receiver for further identifying one or more interface network cards and one or more of the plurality of multicast IP data streams. Similar technique as of claim 11 in claims 19 and 21, and similarity in claims 24-31 with checking IP address whether a private IP address and the introduce of multigroup address as in claims 30-31.
